# Red Hat 6
# Dropping Support

Proposed Schedule

- ■ "t" or development releases haven't been built under RH6 for a couple of months.

- ■ p12: p12.00.00 does *not* have a RH6 version. It's a copy of t02.24.00
    *Proposal, leave it this way.*

- ■ p11: p11.09.00 (p11.10.00 coming "soon"). Do we need RH6? We can maintain it through the end of the p11 sequence. This would be less than 2 months. Would prefer to drop it after p11.10.00.
